2023 Technical Rescue Skills List

as of January 25, 2023

There is no specific list of skills for the Technical Rescue Challenge. Teams should be versed in all aspects of confined space and high angle rope rescue operations. Below is a list of skills that were requested for the 2023 competition based on the survey issued after last year's competition. Scenarios were built to address the skills requested.

All 2023 scenarios can be completed with the skills list and equipment list from 2022.

If you have questions, please contact the Technical Rescue Challenge Chairs for more details.

- Rope ascension
- 2-dimensional load movement (reeve, cross haul, skate block, etc.)
- Ladder operations (patient access and patient egress)
